

ROADSTER

The purest expression of a British sports car.

Unlike anything that has come before.

The spirit of the past. Engineered for the future.

CELERITAS LEVITATIS

THE SPEED OF LIGHTNESS

REDEFINING BRITISH AUTOMOTIVE FOR THE MODERN ERA

A true British sports car should be featherweight, impeccably engineered, and meticulously hand-finished.

While embracing the future, Roadster is born from a reverence for over a century of British motoring heritage — the first electric sports car to truly earn its name by faithfully embodying the very essence of the breed.

Hand-built in England, Roadster has pursued a singular philosophy: simplify, then relentlessly add lightness, until all that remains is sheer automotive intoxication.

A NEW SPECIES IS BORN

"Adding lightness" is the open secret to true speed — not just in a straight line, but in every nuance of motion. Weight invites complexity, blunts agility and dulls the senses.

Speed, agility and safety are inseparable — each shaped by the artistry of lightweight engineering.

With its pioneering lightweight technologies, Longbow introduces an entirely new species: the Featherweight Electric Vehicle {FEV}.

A predator with a silent heartbeat, it hunts in territories where electrification has long feared to tread.

THE SPEED OF LIGHTNESS

Celeritas levitatis — Speaks not just of modern capability but of nimble agility and near-weightless poise, evoking the effortless thrill that defined Britain's most legendary sports cars.

Boudica is the embodiment of defiant grace and indomitable spirit. Bow raised, emerging from the embers of battle, she bestows elegance and ferocity upon your journey.

Be moved — at the speed of lightness.

Tactile, raw, unpredictable. Roadster delivers open-air drama like nothing else.

Every surface, every mechanism, every breath of air exists to amplify the thrill — not to soften it.
